Object Oriented Programming

Activity #1 Variables

Part A - VARIABLE IDENTIFICATION

Variable Name	Data Type	Variable Type	Stored In
owner	String	Instance	Heap
balance	double	Instance	Heap
acc1	Account	Local	Stack
acc2	Account	Local	Stack
acc3	Account	Local	Stack

Part B - Explanation

Statement	What Happens?	Memory Impact
Account acc1 = new Account("carlos", 5000)	It creates an object that has owner - "carlos" and balance - 5000.	Object created stored in heap
Account acc2 = new Account("Diana", 7000)	It creates another object of Acount that has owner - "Diana" and balance - 7000	Object created stored in heap
Account acc3 = acc1;	acc3 object points to or assigned reference to acc1 object	No new object created since it points to same heap
acc2.balance = 8000;	Update acc2 object balance to 8000	acc2 heap object balance change to 8000
acc3.owner = "Miguel";	Update acc3 object owner with same as acc1	acc3 heap object owner change from carlos to Miguel

VICTORY

CamScanner

Part C - OUPUT

Miguel 5000.0
Diana 8000.0
Miguel 5000.0
